FOR IMMEDIATE RELEASE

PRACTICE AND ADJUSTMENTS TO CAR BETTER JENKINS' LAP TIMES

PORTLAND, Oregon (March 31st, 2007) – Practice was intense last Friday as Scottie Jenkins prepared himself and his racecar for the Saturday night race on March 31st, 2007. In the pits Jenkins and his crew chief made minor suspension and steering adjustments to car #51, while on the track Jenkins continued to familiarize himself with the power and handling of the late-model Ford stock car. There was little downtime all evening. Jenkins would come off the track, adjustments would be quickly made with him still in the car, and then he'd be back out on the track testing.

Saturday afternoon qualifications went well for Jenkins, placing 16th in the field of nearly forty cars. "I'd hoped to qualify in the top ten, but for some reason everyone qualified well today. It's very competitive out there," explained Scottie. Next came the autograph session on the front straight, always a favorite with enthusiastic NASCAR fans of all ages.

The Auto Club Late Model race started without incident and Jenkins drove well and moved up several positions. Then, just a few laps before the finish, Jenkins' car cut a tire which immediately took him out of the race. "I don't know what cut the tire, it happened too fast. But that's racing for ya." Despite the unfortunate incident, Jenkins' lap times show steady improvement and he can't wait to get back out on the track. "It was a learning experience. All I can ask for is a good car in my hands so I can bring it to the front. We have a great car and look forward to the next event," said an always-optimistic Scottie.

An environmentally-conscious racer and businessman, Scottie Jenkins is the Plant Manager for Environmental Fibers International, Inc., a family-owned and operated recycling company located in Portland, Oregon.
